

Kings Seeds

Seed sowing success

Tips for striking seed

Use a quality seed raising mix - don't use potting mix as it contains fertiliser and lumpy bits, which hinders germination

Before sowing the seed, wet the mix and let the trays drain

Once seed has been sown, spray wet with a mist spray

If you are sowing a few packets, do remember to label them - you will forget when you go to transplant

Once planted, place somewhere warm, once germinated seeds need plenty of light

Sow seeds every two to three weeks for continuous harvesting

Sow extra, not every seed will germinate

Portstone has been stocking Kings Seeds for over 25 years

If you are wanting to grow mainstream varieties or that something different then try Kings Seeds.

Available in the following

Flowers

Vegetables

Herbs

Microgreens

Organics

Come in a browse our Kings Seeds stand, view the catalogue and let us know if you wish to order seeds.
